SUMMARY

A detail-oriented software engineering graduate with hands on experience in developing and maintaining enterprise web applications, automation tools, and RESTful APIs. Experienced in PHP, C#, ASP.NET, React, Java and system integration within manufacturing and corporate environments. Strong foundation in backend development, system support and process automation.

WORK EXPERIENCE

IT Executive (Software), Toyo Tires

March 2026 - Present

- Performed daily system monitoring and troubleshooting for MES and internal systems
- Developed and maintained MES features using VB.NET and C#
- Built and automated internal workflows using C#, Power Automate, and AI Builder, improving process efficiency

IT Technician, YBS International Berhad

July 2025 - March 2026

- Developed and maintained internal web applications including E-Appraisal, IT Request System Management, and IT Asset Management systems using PHP, MySQL, Rest APIs, Docker and Git.
- Designed database schemas and implemented CRUD workflows to support internal operations.
- Managed MES system for production line (PCB) and assisted in setting up the system and infrastructure.
- Provide comprehensive IT support across 3 manufacturing plants, ensuring minimal downtime and efficient issue resolution.
- Administered Windows Server, Active Directory, and Microsoft 365, including backups, patching, and access control.
- Provided IT and application support across 3 manufacturing plants, minimizing downtime and improve response efficiency

Application Developer Intern, Spritzer Berhad

Aug 2024 - Jan 2025

- Developed automation tools using React, TypeScript, ASP.NET, reducing manual workload
- Integrated ManageEngine API with C# and automated workflows using Power Automate
- Built reporting dashboards using Power BI and Excel
- Improved system efficiency by leveraging machine learning and C# to accurately predict and auto-complete missing or incorrect ticket fields, minimizing data inconsistencies.

Freelance, Self - Employed (FlutterFlow)Jan 2023 - Jun 2024

- Developed a cross-platform application using FlutterFlow, integrating Firebase for backend functionality, including real-time database, authentication, and cloud functions.

Sales Assistant, Sow Wing Moulding CompanyJan 2020 - Dec 2020

- Dealing with customers, payment, inventory management and customer service.

EDUCATION

Bachelor of Computer Science (Software Engineering) with Honours2021 - 2025

University of Malaysia Terengganu

- CGPA: 3.40

Foundation in STeM2020 - 2021

University of Malaysia Terengganu

- CGPA: 3.96

SPM2015 - 2019

SMK Taman Tasik, Taiping

- 8A 1B

ADDITIONAL INFORMATION

Languages & Frameworks:

- PHP, C#, Java, Python, ASP.NET, Spring Boot, React, CodeIgniter, Flask

Web & APIs:

- RESTful APIs, Postman, HTML, CSS, JavaScript

Databases:

- MySQL, PostgreSQL, SQL, Firebase, SSMS

DevOps & Tools:

- Docker, Git, GitHub, Power Automate, Power BI, Rector, Google Colab, scikit-learn, ml.net, Google AI Studio, Gemini API Integration, Microsoft AI Builder

System & Platforms:

- Window Server, Active Directory, Microsoft 365

- Languages:** English, Malay, Thai
- Certifications:** Artificial Intelligence Fundamentals (IBM SkillsBuild), Data Fundamentals (IBM SkillsBuild)
- Awards/Activities:**
 - Top 10 Best Debater, "Debat Uniti Keluarga Malaysia, Piala YB Menteri Perpaduan 2022".
 - Champion and Best Debater, UMT Vice Chancellor Cup Debate Competition 2022.
 - Google Developer Fest, Georgetown [LangChain, Vertex AI, SQL and GenAI with Firebase Data, Fundamentals of Flutter]
 - Endurance running, trail races, futsal
